

# ORACLE SCHOOL

## Video 1: Introduction to Bringing Your Magic To The World

- Amazing journey and thank you for trusting me to be a part of this journey into you.
- After this week there will be a further week to get the hang of the material, then things will continue in Summer Camp.
- Everyone will come out of the small rooms and gather in the Main Hall, which will become Summer Camp.
- In Summer Camp you'll continue your daily cards, meet each other from other rooms, hang out with everyone and read different posts, and get to do all kinds of fun stuff.
- Some will want to continue to the next level, Shared Wisdom, which leads to certification, and you get to be a mentor.
- This final module is an invitation to look deeply into your experience so far. It's time to take an inventory of your evolution, from the observer to the manifestor.
- You will be introduced to new spreads and ideas to keep you exploring new ways of working with the cards, keep you aligned with your highest good and discover your unique, authentic and inspired life.
- The cards ignite something in us and there's new vision, we become visionary. The entire world wakes up when we start to understand how to work with the Oracle Cards.
- How have you changed from when you first came to where you are now? While the small groups are open, go back and review some

# ORACLE SCHOOL

of your earlier posts, review earlier journal entries, and reflect on the differences between then and now. How have you changed your ability to self-evaluate, be more neutral and less judgmental about yourself and others? Write it all down.

- How do synchronicity events show up for you? Have you noticed differently? Are you more aware of them? Have you noticed specific things that come up more than once for you?
- One of the best things learned in Oracle School is that we start to recognize the flow of things and we no longer are so attached to an outcome that we think is going to change us.
- We will always be a story in motion. Has the story you used to tell shifted?
- When you start working with the Oracle Cards you become more in-tune with your side of the street. You have a new way of looking at the world now. What do you notice most?
- What kind of birds show up for you? Do they change in your meditation? Do you notice them showing up in your outer world?
- You start to become more aware of the outer environment that you're in and how nature speaks and not just in the Oracle Cards themselves. You start to be awake to everything.
- You're not just learning the cards, but you are also learning how nature and your environment correlates to what you see in your cards on any given day. Begin thinking about that as more of this will be taught in Shared Wisdom.
- Notice the correlation between how you feel, what you see, the symbolism that comes up for you in the meditations, and how they relate directly to your Oracle Cards.
