

Working With Apps vs Cards

HI THERE!

My Oracle Cards come in two forms, the physical deck- you know the one you hold in your hands and shuffle, and the app version for your device. There seems to be a lot of debate as to which is better and people always want to know, "What's the difference between using the app and using the physical deck in a card reading?"

As far as accuracy, there is no difference, they are exactly the same! The same Universe giving you the same guidance. Plus all the card meanings are the same.

The rest is really just personal preference. Some people love their physical decks and will not do a reading without one. Others feel the exact same way about their app. Me? I love both!

When I'm at home, I always prefer the physical deck. I just love to shuffle and feel the cards in my hands as I pick. For traveling, let's just say it's a lot easier to only carry my phone than to have to pack a separate bag just for all of my decks! Plus, I love that I have the app handy no matter where I am should I decide I need some guidance. Ever out to dinner with friends when you suddenly wish you had a deck handy? I just pull out my phone!

If you have a physical deck, take turns choosing cards from there and choosing one for free on my website. Keep notes in your journal about the readings.

If you don't have a physical deck, no worries!! You can also go to my website and get to know the cards for free!

Remember, for my Oracle Cards, there is no difference between the physical deck and the app when it comes to the accuracy of the readings!

That's it for this mini-lesson,

Love Colette
